

Digest Title

Abstract– Type your abstract here. Use 12 pt font (bold), 1.2 line-spacing and single column. The abstract must not exceed 150 words. It is suggested to avoid using symbols, special characters, footnotes, or math in paper title or abstract. **No author names or affiliations can be included in the digest.** Note that when generating the PDF document, ensure that no author details are included in the PDF file properties (accessible via <Ctrl+D>).

*****CRITICAL***:**

When submitting the digest, the corresponding author is requested to ensure that, in the final paper, the percentage of self-citations remains below 25%.

Keywords- optional for the digest

I. INTRODUCTION

The digest is meant to be a short version of your intended paper that facilitates quick and easy review [1]. Digests with less of three (3) pages will be not considered valid. The digest, starting with the ‘*Abstract*’ and ending with the ‘REFERENCES’ must be **at most five (5) page long**. The digest has a maximum file size of 8 MB. You are required to submit references as part of the digest. The REFERENCES section must be included within the five-page limit. Use letter format with 12-point font, 1.5 line spacing, a single column, and 1-inch (25.4 mm) margins. Please do not submit a full length, single-spaced paper that is simply cropped down to five pages.

II. FIRST SECTION

Enter the text, equations, figures and tables for your first full section here. The ECCE Technical Program Committee recommends following this format/template for digest preparation (see Appendix I for details). Table headers should appear above the tables (see Table I as an example), while figure caption should be centered beneath the figures (see Fig. 1 as an example [2]). Figures and tables should be inserted after they are cited in the text, not at the end of the digest. Use the abbreviation ‘Fig. 1’, ‘Fig. 2’, etc., even at the beginning of a sentence.

TABLE I. SAMPLE TABLE

Table Header	Table Column Header		
	Table column sub-header	Sub-header	Sub-header
copy	More table copy ^a		

It is recommended to use a ‘text box’ without outlines to insert a figure, ideally as 300 dpi TIFF or EPS files with all fonts embedded. The font size of any text within figures should be easily readable and comparable to the font size used in the figure captions. Fig. 1 shows an example to include figures inside the digest.

III. SECOND SECTION

Enter the text, equations, figures and tables for your first full section here. Repeat as necessary for other sections [1]–[4]. Equations should be expressed in the following format and cited in the text as (1) and not ‘Eq. (1)’:

$$y = f(x + \alpha) \quad (1)$$

IV. CONCLUSION AND FUTURE WORK

Present your conclusions here, along with your plans for final full paper submission, assuming your digest is accepted. Keep in mind that ECCE reviewers highly value experimental results and real-world applications. Therefore, ensure these aspects are well-addressed in your digest. Demonstrated experimental work will be regarded more favorably than mere promise of future experiments.

(a)

(b)

Figure 2: Sample figures for a row text: (a) figure on the left; (b) figure on the right.

APPENDIX I (*optional for the digest*)

Before sending the digest for review, the ECCE Technical Program Committee will verify the validity of the submission. The following issues will be considered the main reasons for returning the digest to the author(s).

- The digest is too long (more than 5 pages)
- The digest is too short (less than 3 pages)
- The digest is not anonymous: author details appear in the digest AND/OR in the pdf file properties (accessible via <Ctrl+D>)
- The digest format cannot be accepted (e.g., not single-column, too small font, too narrow line spacing, the figures are of low quality, the reference is not in IEEE style, among others)

Note that due to the 5-page limit, only key references should be included at the end of the digest. The complete reference list, in compliance with the self-citation rule, is expected in the final paper submission.
